CS4044 – FUNDAMENTALS OF PROJECT MANAGEMENT

FALL 2024 PROJECT

Students will be working in groups of MAXIMUM 6 PEOPLE.

The organization that you are involved with, has asked you to prepare a software project proposal and a plan that contains enough information for management to give approval for the project and organize the entire project respectively.

Students are required to prepare a Project Proposal and Plan for a project of their choice that they will plan to develop. Students shall work on project plan throughout the remainder of the course.

You should choose a project that might be undertaken by an organization. The project you choose should not be very large or complex. It should be a project that would take at least 6 months (but no longer than 12 months) to complete. Your choice of project will be assessed as part of the assignment.

TENTATIVE SUBMISSION DATE: LAST WEEK OF SEMESTER (BEFORE EXAMS)

THE PROJECT PROPOSAL AND PLAN:

1.	Business Statement (04 marks)	• *Organization Background* • *Opportunity Or problem that the project will be addressing*
2.	Project Team (04 marks)	• *Identify the number and type of each resource required for the project. Why are these resources needed? Consult your **expert*** • *Create project team structure. Describe it with reasoning*
3.	Feasibility Analysis (04 marks)	• *Conduct four types of feasibility and rate them on a scale of 1 to 10.* • *Proper Justification for each feasibility* • *Identify the CSF of the projects. Why they are critical? Any measure taken?*
4.	Project Goal/Purpose/Aim/ Objectives (04 marks)	• *Aim of the project* • *Goals that the project will meet* • *Benefits that the project will give to organization*
5.	Project Deliverables (04 marks)	• *Deliverables needed to make project successful* • *Link objectives to deliverable* • *Success Criteria*
6.	Project Scope (10 marks)	• *Boundaries of the project* • *Things included & excluded* • *Various Parts & Phases of the project* • *Success Criteria*

		• *Software Process Model used to build the project*
7.	**Agile User stories** (6 marks)	• *Model your requirements through user stories for every user of the system. The requirements should be complete and the stories should be concise. These user stories should follow the rules studied in class.*
7.	Assumptions, Constraints and Dependencies (5 marks)	• *Assumptions made* • *Time, resources, finance, business and other technical constraints* • *External Factors the project is dependent on*
8.	Stakeholders (05 marks)	• *Identification & Roles of various stake holders* • *Responsibilities of Stakeholders for various aspects of projects* • *What deliverables are stakeholders responsible for and how? Who are Signing Authorities?*
9.	Expert (04 marks)	• *Expert Chosen, His domain, Job Title,* • *Why have you chose him as an expert* • *His Past experiences & success* • *His role in the project*
10.	Work Breakdown Structure (10 marks)	• *Consult your expert & Construct a WBS of the project (At least 180 activities)* • *Include suitable Numbering system & get the WBS signed by the **expert***
11.	MS Project Plan (15 marks)	• *WBS broken down into individual task* • *Give task number, name, estimated duration, start date& end date, predecessor, Resource name or roles for that task (get it verified by **expert**)* • *Start Date 01st October 2024 and include all Pakistan Holidays & Assume an 8 hour work per day* • *Construct & show Network diagram – Project completion time {Critical Path & Duration}*
12.	Risk Management (10 marks)	• *Identify five tasks that might be risky for your project & how will you manage them. Consult your **expert*** • *Describe why they are risks.*
13.	Time Phased Budget (15 marks)	• *Produce Time Phase Budget Spreadsheet to estimate the total project costs* • *Resource Sheet, Cost Sheet & summary should be included*

Submission Requirement: Formal Report Submission both in hard copy & Soft copy. Cost Plan in excel and Project Plan in MS Project
