

Topic # 10A
Project Human Resource Management - Planning & Managing Team
Chapter 9, 10 - Schwalbe
Chapter 9 - PMBOK, Reference

Project Human Resource Management

- Making the most effective use of the people involved with a project
- Processes include
  - ***Planning human resource management***: identifying and documenting project roles, responsibilities, and reporting relationships
  - ***Acquiring the project team***: getting the needed personnel assigned to and working on the project
  - ***Developing the project team***: building individual and group skills to enhance project performance
  - ***Managing the project team***: tracking team member performance, motivating team members, providing timely feedback, resolving issues and conflicts, and coordinating changes to help enhance project performance

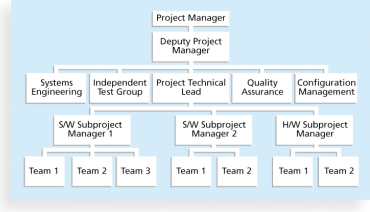

Project Human Resource Planning

- *Involves identifying and documenting project roles, responsibilities, and reporting relationships*
- *Content includes*

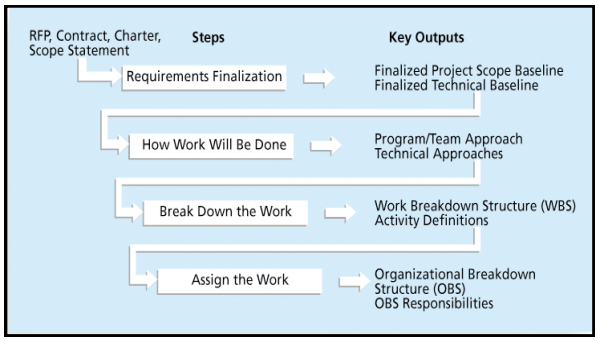

Sample Org Chart for Large IT Projects

Process for Defining & Assigning work

- A ***responsibility assignment matrix (RAM)*** is a matrix that maps the work of the project as described in the WBS to the people responsible for performing the work as described in the Organization Breakdown Structure
- Can be created in different ways to meet unique project needs

WBS activities →

OBS units	1.1.1	1.1.2	1.1.3	1.1.4	1.1.5	1.1.6	1.1.7	1.1.8
Systems Engineering	R	R P					R	
Software Development			R P					
Hardware Development				R P				
Test Engineering	P							
Quality Assurance					R P			
Configuration Management						R P		
Integrated Logistics Support							P	
Training								R P

R = Responsible organizational unit
P = Performing organizational unit

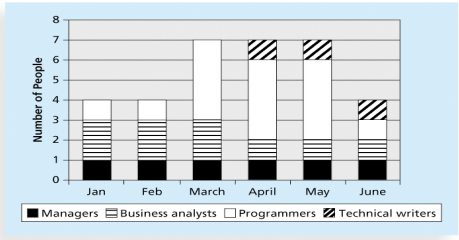

- *Note that some people reverse the definitions of responsible and accountable*
- *(* A simple tool that is very effective to communicate roles & expectations of important stakeholders on project)*

Staffing Management Plans

- A **staffing management plan** describes when and how people will be added to and taken off the project team
- Staffing management plan can be formal or informal plan and the level of detail can be varied on the type of project.
- It would also describe how these resources would be acquired, trained, rewarded, reassigned after the project, and so on.
- A **resource histogram** is a column chart that shows the number of resources assigned to a project over time
- After developing the staffing plan, now there is a need to acquire the staff and then create the project team

Resource Histogram

Importance of HRM

- Many corporate executives have said, "*People are our most important asset*"
- People determine the success and failure of organizations and projects
- Human Resource Management is one of the vital components of project management, especially in IT field in which qualified people are often hard to find and keep.

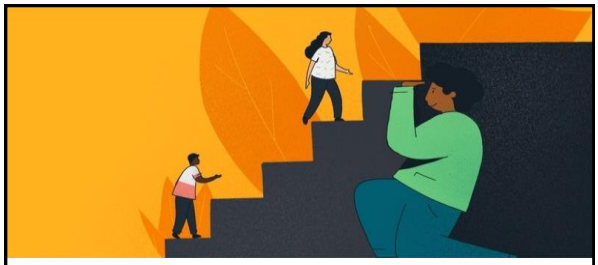

- Proactive organizations are addressing workforce needs by
  - improving benefits
  - redefining work hours and incentives
  - finding future workers
- Many companies have changed their benefits policies to meet worker needs and the companies provide perks such as:
  - Casual Dress Code
  - Flexible work hours
  - Tuition assistance
  - Children's' tuition paying
  - Vacations
  - Overtime can be avoided

Issues Affecting Team Success

Issues affecting team success

- Presence of a shared mission and goals
- Motivation and commitment of team members
- Experience level
  - and presence of experienced members
- Team size
  - and the need for bounded yet sufficient communication
- Team organization
  - and results-driven structure
- Reward structure within the team
  - incentives, enjoyment, empowerment (ownership, autonomy)

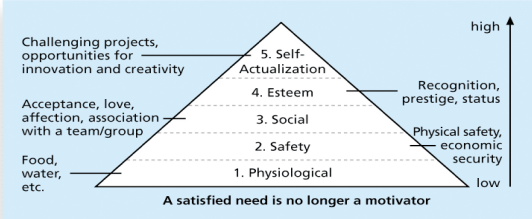

Key to Managing People

- Psychosocial issues that affect how people work and how well they work are:
  - Motivation
  - Influence & Power
  - Effectiveness
- **Motivation Definition:**
  - The process that accounts for an individual's intensity, direction and persistence of effort toward achieving a goal.
- **WHAT MOTIVATES YOU?**
  - Think of some factors that motivates you in a job.

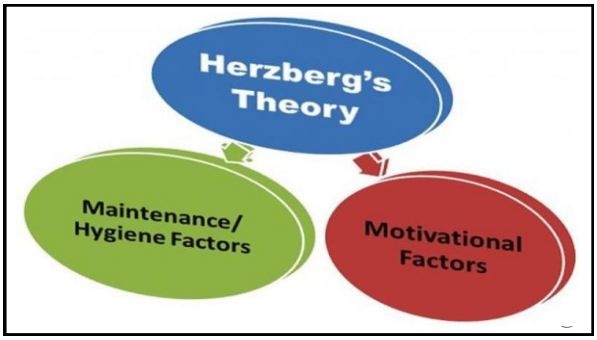

Maslow's Hierarchy of Needs

*•Maslow developed a **hierarchy of needs** which states that people's behaviors are guided or motivated by a sequence of needs*

McGregor's Theory X & Y

Theory X	• Manager assumes workers dislike and avoid work, so managers must use coercion, threats and various control schemes to get workers to meet objectives
Theory Y	• Manager assumes individuals consider work as natural as play or rest and enjoy the satisfaction of esteem and self-actualization needs
Theory Z	• Introduced in 1981 by William Ouchi and is based on the Japanese approach to motivating workers, emphasizing trust, quality, collective decision making, and cultural values

- Herzberg's theory distinguished between

Motivational factors(Intrinsic factors)	Hygiene factors (Extrinsic factors)
Achievement, recognition, the work itself, responsibility, advancement, and growth, which produce job satisfaction	Cause dissatisfaction if not present, but do not motivate workers to do more. Examples include larger salaries, more supervision, and a more attractive work environment

Herzberg Theory

Hygiene Factors	Motivators
Larger salaries	Achievement
More supervision	Recognition
More attractive work environment	Work itself
Computer or other required equipment	Responsibility
Health benefits	Advancement
Training	Growth

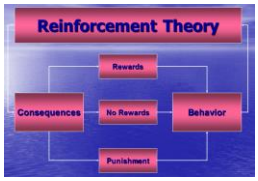

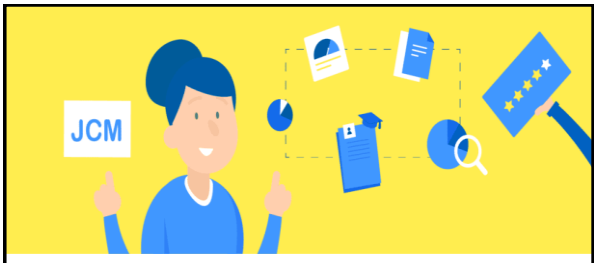

McClelland's Theory of Acquired Needs

- Specific needs are acquired or learned over time and shaped by life experiences, including:
  - **Achievement (nAch):**
    - Achievers like challenging projects with achievable goals and lots of feedback
  - **Affiliation (nAff):**
    - People with high nAff desire harmonious relationships and need to feel accepted by others, so managers should try to create a cooperative work environment for them
  - **Power: (nPow):**
    - People with a need for power desire either personal power (not good) or institutional power (good for the organization). Provide institutional power seekers with management opportunities

Other Motivational Theories

- **Goal Setting Theory:**
  - Specific and Difficult goals, with feedback lead to higher performance.
- **Reinforcement Theory:**
  - Behavior is a function of its consequences.

Job Characteristics Model

- Skill variety
- Task identity
- Task significance
- Autonomy
- Feedback

Demotivation in teams

- What takes away your motivation?
  - Micro-management or no management
  - Lack of ownership
  - Lack of effective reward structure
    - Including lack of simple appreciation for job well done
  - Excessive pressure and resulting "burnout"
  - Allowing "broken windows" to persist
  - Lack of focus in the overall direction
  - Productivity barriers
    - Asking too much; not allowing sufficient learning time; using the wrong tools
  - Too little challenge
  - Work not aligned with personal interests and goals
  - Poor communication inside the team

Ways to Have Influence on a project

1. **Authority:** the legitimate hierarchical right to issue orders
2. **Assignment:** the project manager's perceived ability to influence a worker's later work assignments
3. **Budget:** the project manager's perceived ability to authorize others' use of discretionary funds
4. **Promotion:** the ability to improve a worker's position
5. **Money:** the ability to increase a worker's pay and benefits
6. **Penalty**: the project manager's ability to cause punishment
7. **Work challenge**: the ability to assign work that capitalizes on a worker's enjoyment of doing a particular task
8. **Expertise**: the project manager's perceived special knowledge that others deem important
9. **Friendship**: the ability to establish friendly personal relationships between the project manager and others

Influences on projects

- Projects are more likely to ***succeed*** when project managers influence with
  - expertise
  - work challenge
  - And …..
- Projects are more likely to ***fail*** when project managers rely too heavily on
  - authority
  - money
  - penalty

Power

- **Power** is the potential ability to influence behavior to get people to do things they would not otherwise do.
- Power has a much stronger connotation than influence,
- Five Types of power include
  1. **Coercive Power:** involves using punishment, threats, or other negative approaches to get people to do things they do not want to do.
  2. **Legitimate Power**: is getting people to do things based on a position of authority.
  3. **Expert Power**: involves using personal knowledge and expertise to get people to change their behavior.
  4. **Reward Power**: involves using incentives to induce people to do things.
  5. **Referent Power**: is based on an individual s personal charisma.

It is important for project managers to understand what types of influence and power they can use in different situations.
